

Journal of Micropalaeontology

Volume 10, Part 1, August 1991

CONTENTS

1.	The generic revision of the Reussellids (Foraminiferida) Stefan A. Revets	1
2.	Micropalaeontology Notebook The search for a reliable mounting medium for Recent 'live' foraminifera C. Maybury, L. Morrison & V. Stewart	16
3.	The Ostracoda community in hypersaline channels in Al-Khiran, Arabian Gulf Sabeekah Al-Abdul Razzaq	17
4.	Micropalaeontology Notebook Detecting radiolaria in the field Simon K. Haslett & Paul D. Robinson	22
5.	On the Tertiary genus <i>Soudanella</i> Apostolescu (1961) (Ostracoda, Crustacea) Richard A. Reyment and Josef F. Aranki	23
6.	<i>Kirkbyites</i> Johnson, a valid ostracod genus from the Upper Palaeozoic Gerhard Becker	29
7.	Recent benthic foraminifers from Tarut Bay, Arabian Gulf coast of Saudi Arabia M. Abou-Ouf Sayed Ahmed	33
8.	Detailed biostratigraphy of the Santonian/Campanian boundary interval in Northern Israel A. Almogi-Labin, Y. Eshet, A. Flexer, A. Honigstein, S. Moshkovitz & A. Rosenfield	39
9.	Conodonts of the Dounans Limestone, Highland Border Complex, Scotland R. L. Ethington & R. L. Austin	51
10.	Paleoecology of Late Eocene-Oligocene foraminiferal assemblages in a two-well transect across the North-East Newfoundland shelf F.C. Thomas	57
11.	<i>Paralesleya perforata</i> gen. et sp. nov., a new ostracod species from the Latest Jurassic of Northwest Europe L. Witte & T.H. Lissenberg	69
12.	Exceptional new record of Cretaceous Hauterivian Angiospermid Pollen from Southern England N.F. Hughes, A.B. McDougall and J.L. Chapman	75
13.	Henry Hopley White (1790-1877) and the early researches on Chalk "Xanthidia" (marine palynomorphs) by Clapham microscopists William A.S. Serjeant	83
14.	Ostracods and foraminifera from the Early - Middle Eocene of Qeren Sartaba, Jordan Valley A. Honigstein, A. Rosenfield & C. Benjamini	95
15.	Benthic foraminiferids as pollution indicators in Southampton Water, southern England, U.K. A.R. Sharifi, I.W. Croudace, and R.L. Austin	109
	Instructions to authors	114
