

Journal of Micropalaeontology

Volume 12, Part 2, December 1993

CONTENTS

1.	Middle Eocene Ostracoda from Baja California Sur, Mexico Carreno & Cronin	141
2.	The Foraminiferal Toothplate, A Review S. Revets	155
3.	<i>Piallina tethydis</i> gen. et sp.nov. (Foraminiferida) from the Triassic (Carnian) of the Kocaeli Peninsula, Turkey R Rettori, L. Zaninetti, R. Martini & D. Vachard	171
4.	Smaller Benthonic Foraminifera from the Gahodleh Shales (Late Jurassic) of Somalia, and their Stratigraphic Significance R. Wynn-Jones	175
5.	Emendation of the foraminiferal genus <i>Cribostomoides</i> Cushman, 1910, and its taxonomic implications R. Jones, H. Bender, M. Charnock, M.A. Kaminski & J. Whittaker	181
6.	A biostratigraphic revision of the Eocene and Oligocene foraminiferal type localities of Trinidad described by Cushman & Stainforth (1945) and Cushman & Renz (1948) C.M. McCabe, M.A. Kaminski & E. Finch	195
7.	Biostratigraphy and palaeoenvironmental analysis of a Lower to Middle Jurassic succession on Anholt, Denmark M.S. Seidenkrantz, E.B. Koppelhus & H. Ravn-Sorensen	201
8.	Selected <i>Cribroperidinium</i> species (Dinophyceae) from the Kimmeridgian and Volgian of northwest Europe D.A. Bailey	219
9.	Orbitally induced cycles in benthonic foraminiferal morphogroups and trophic structure distribution patterns from the Late Albian "Amadeus Segment" (Central Italy) R. Coccioni & S. Galeotti	227
10.	The taxonomy and apparatus structure of the Silurian distomodontid conodont <i>Coryssognathus</i> Link & Druce, 1972 C. Giles Miller & R.J. Aldridge	241

MICROPALAEONTOLOGY NOTEBOOKS

1.	A secondary stage design for the preparation of microfossils for the SEM for scanning electron microscopy S. Tatman	154
2.	An early representative of the genus <i>Frambocythere</i> Colin, 1980: <i>Frambocythere pustulosa</i> (Grékov, 1957) from the Albian of Zaire J.P. Colin	170
3.	Note on the use of hydrofluoric acid for the recovery of conodonts from Ordovician cherts in the Southern Uplands of Scotland and the significance of the conodonts R. Etherington & R. Austin	194
