

# Journal of Micropalaeontology

Volume 13, Part 2, December 1994

## CONTENTS

1. **'*Nodibeyrichia jurassica*' and associated beyrichiacean ostracode species and their significance for the correlation of late Silurian strata in the Baltic and Britain**  
W. Hansch and D. J. Siveter 81
2. **DSDP Site 594, Chatham Rise, New Zealand—Late Neogene planktonic foraminiferal biostratigraphy revised**  
N. de B. Hornibrook and D. G. Jenkins 93
3. **Computer analysis of benthic foraminiferal associations in a tidal New Zealand inlet**  
B. W. Hayward and C. M. Triggs 103
4. **New dinocyst taxa from the Eocene of the North Sea**  
J. P. Bujak 119
5. **Micropalaeontology of the hydrothermal region in the Guaymas Basin, Mexico**  
A. Ayala-López and A. Molina-Cruz 133
6. **A charophyte flora from the Lower Pechelbronn Formation (?Upper Eocene/?Lower Oligocene) of Malsch south of Heidelberg (SW Germany)**  
J. Schwarz and Th. W. Griessemer 147
7. **Notes on the topotype and deep-sea specimens of the planktonic foraminifer *Cassigerinelloita amekiensis* Stolk**  
Qianyu Li and S. Radford 157

---

## MICROPALAEONTOLOGY NOTEBOOKS

1. **Tubicolous polychaetes as substrates for epizoic foraminifera**  
M. R. Longier and H. Bagi 132
