

Journal of Micropalaeontology

Volume 17, Part 1, April 1998

CONTENTS

1. **A re-examination of the Pliensbachian and Toarcian Ostracoda of Zambujal, west-central Portugal**
I. Boorner, N. R. Ainsworth and J. Exton 1
2. **The depth distribution of Ostracoda from the Greenland Sea**
R. Whatley, M. Eynon and A. Mogueilevsky 15
3. **Upper Wenlock to Lower Přídolí (Silurian) conodont biostratigraphy of Saaremaa, Estonia, and a correlation with Britain**
V. Vira and R. J. Aldridge 33
4. **New species of the genus *Parkiella* (Foraminifera) from the Late Cretaceous Central Pacific Ocean: biostratigraphy, biogeography, and the Cretaceous–Palaeogene boundary**
J. G. V. Widmark and M. Kucera 51
5. **Palaeogene triserial planktonic foraminifera**
D. G. Jenkins, J. E. Whittaker and D. Curry 61
6. **Late Miocene calcareous nannofossil genus *Catinaster*: taxonomy, evolution and magnetobiochronology**
A. Peleo-Alampay, D. Bukry, Li Liu and J. R. Young 71
7. **Planktic and benthic foraminiferal distribution patterns as a response to changes in surface fertility and ocean circulation: a case study from the Late Albian 'Amadeus Segment' (Central Italy)**
S. Galeotti 87

MICROPALAEONTOLOGY NOTEBOOKS

1. **A new dinoflagellate cyst from the Upper Bathonian (Middle Jurassic) strata of the Russian Platform**
J. B. Riding and V. I. Ilyina 86

Abstracted and/or indexed in *Current Contents*, *Science Citation Index*, *GeoArchive*, *GeoRef*, *Geobase*, *Geological Abstracts* and *CABS (Current Awareness in Biological Sciences)*

Cover Photograph. *Siderolites calcitrapoides* Lamark, 1801,
Maastrichtian, ENCI Quarry, Maastricht, Netherlands.

Price: £40.00
