

# Journal of Micropalaeontology

Volume 32, Part 2, July 2013

## CONTENTS

- Challenging deep-sea cosmopolitanism: taxonomic re-evaluation and biogeography of 'Cythere dasyderma Brady, 1880' (Ostracoda)**  
S. N. Brandão & M. Yasuhara 109
- Spatial distribution of living coccolithophores in the southwestern Gulf of Mexico**  
K.-H. Baumann & B. Boeckel 123
- Overview of Recent and Holocene ostracods (Crustacea) from brackish and marine environments of Portugal**  
M. C. Cabral & I. M. Loureiro 135
- The Helgoland Experiment – assessing the influence of methodologies on Recent benthic foraminiferal assemblage composition**  
J. Schönfeld, E. Golikova, S. Korsun & S. Spezzaferri 161
- A fungal proliferation near the probable Oligocene/Miocene boundary, Nukhul Formation, Gulf of Suez, Egypt**  
H. El Atfy, R. Brocke & D. Uhl 183
- New data on the stratigraphic distribution of the nannofossil genus *Catinaster* and on evolutionary relationships among its species**  
M. Ciommelli & I. Raffi 197
- On the Lower Cambrian biotic and geochemical record of the Hetang Formation (Yangtze Platform, south China): evidence for biogenic silica and possible presence of Radiolaria**  
L. Zhang, T. Danelian, Q. Feng, T. Servais, N. Tribovillard & M. Caridroit 207

## MICROPALAEONTOLOGY NOTEBOOKS

- Staloliths: neglected microfossils**  
M. B. Hart, A. De Jonghe, A. J. Rundle & C. W. Smart 219
- Occurrence of a rare puncioid ostracod, *Promanawa konishii* (Nohara, 1976), in Recent sediments of the East China Sea**  
H. Iwatani, T. Irizuki & M. Yasuhara 221
