

Journal of Micropalaeontology

Volume 35, Part 2, July 2016

CONTENTS

| | |
|--|-----|
| Grass pollen surface ornamentation: a review of morphotypes and taxonomic utility L. Mander & S. W. Punyasena | 121 |
| <i>Formonsella pyramidosa</i> (Haptophyta, Papposphaeraceae): a new weakly calcified coccolithophore genus from warm-water regions H. A. Thomsen, L. Cros, E. Malinverno, J. B. Østergaard, M. Y. Cortés, M. Geisen & J. R. Young | 125 |
| Upper Cretaceous radiolarians reworked in the Eocene London Clay Formation, SE England T. Fer, T. Danelian & H. W. Bailey | 133 |
| <i>Hyalolithus tumescens</i> sp. nov., a siliceous scale-bearing haptophyte from the middle Eocene K. Abe, H. Tsutsui & R. W. Jordan | 143 |
| Megaspores and associated palynofloras of Middle Jurassic fluvio-deltaic sequences in North Yorkshire and the northern North Sea: a biofacies-based approach to palaeoenvironmental analysis and modelling P. M. Morris & D. J. Batten | 151 |
| Morphological abnormalities in benthic foraminifera caused by an attached epibiont foraminifer A. O. Amao, M. A. Kaminski & F. Frontalini | 173 |
| Cenozoic silicoflagellate skeletal morphology: a review and suggested terminology K. McCartney & J. Witkowski | 179 |
| Did the silicoflagellate genus <i>Octactis</i> evolve from <i>Bachmannocena</i>? K. McCartney, R. W. Jordan & K. Abe | 190 |
| Approaches and constraints to the reconstruction of palaeoproductivity from Cape Basin abyssal benthic foraminifera (South Atlantic) P. Diz & S. Barker | 195 |
| Middle Jurassic Tethyan–Boreal ostracod faunal links: a case study from the Callovian of Portugal V. Pais, M. C. Cabral, A. Lord, A. C. Azerêdo & L. Gallagher | 205 |

Micropalaeontological Notebook

| | |
|---|-----|
| Taponomic impact of ultrasonic treatment on foraminifera from a deep-sea carbonate ooze R. Van Bael, A. D. Deprez, P. Stassen, A. Bornemann & R. P. Speijer | 229 |
|---|-----|
