

# Journal of Micropalaeontology

Volume 7, Part 1, May 1988

## CONTENTS

1. <b>Planktonic foraminifera from the Pliocene Coralline Crag of Suffolk, Eastern England</b> D. G. Jenkins, D. Curry, B. M. Funnel & J. E. Whittaker	1
2. <b>Ecophenotypic variation in <i>Mutilus purnilus</i> (Ostracoda) from Australia, studied by canonical variate analysis and tensor biometrics</b> R. A. Reyment, F. L. Bookstein, K. G. McKenzie & S. Majoran	11
3. <b>A revision of Brady's 1869 study of the Ostracoda of Hong Kong</b> R. Whatley & Zhao Quanhong	21
4. <b>A technique for laboratory sub-sampling of non marine fossil Ostracoda</b> D. L. Danielopol & L. Casale	31
5. <b>The use of sodium polytungstate for conodont separations</b> N. M. Savage	39
6. <b>A note on some type specimens of G. S. Brady's South Sea island ostracods</b> P. S. Davis & D. J. Horne	41
7. <b>X-raying planktonic foraminifera</b> P. N. Leary & M. B. Hart	43
8. <b>Late Miocene Ostracoda from NW Libya</b> A. A. El-Waer	45
9. <b>A technique for viewing the same nannofossil specimen in light microscope and scanning electron microscope using standard preparation materials</b> L. T. Gallagher	53
10. <b>Speciation and structural evolution in the Palaeocene <i>Morozovella</i> lineage (planktonic Foraminiferida)</b> R. M. Corfield & A. H. Granlund	59
11. <b>Ultrastructural analysis of selected Cretaceous megaspores from Argentina</b> W. A. Taylor & T. N. Taylor	73
12. <b>Septa, septal traces and septal filaments in the foraminiferal genus <i>Nummulites</i> Lamarck</b> C. G. Adams	89
13. <b>The Cretaceous spore <i>Stoverisporites</i> and its taxonomy and stratigraphy</b> C. Felix & P. Burbridge	103
