

# Journal of Micropalaeontology

Volume 8, Part 2, December 1989

## CONTENTS

1. **Quantitative analysis of the *Arkhangelskiella cymbiformis* Group and Biostratigraphic usefulness in the North Sea Area**  
O. Varol 131
2. **The Ostracod Genus *Actinocythereis* from the Middle Miocene of Northern Iraq**  
S. K. Khalaf 135
3. **The Foraminiferal assemblages across three middle Turonian marl bands and a note on their genesis**  
P. N. Leary and D. S. Wray 143
4. **The Heron-Alien & Earland Type Slide Collection of Foraminifera in the British Museum (Natural History)**  
R. L. Hodgkinson 149
5. **Ostracods as palaeoenvironmental indicators in the Lower Carboniferous Yoredale Series of northern England**  
H. Masurel 157
6. **Maastrichtian Heterohelicidae (Planktonic Foraminifera) from the North West Atlantic**  
A. J. Nederbragt 183
7. **New data on the ostracod genus *Aratrocypris* Whatley et al. 1985, with descriptions of species from the Upper Cretaceous of Europe and the Cainozoic of the North Atlantic**  
R. Whatley, L. Witte and G. Coles 207
8. **Notes on the Foraminiferal Genera *Laterostomella* De Klasz and Rerat and *Streptochilus* Bronniman and Resig**  
I. de Klasz, D. Kroon and J. E. van Hinte 215
9. **Micropalaeontology of the Permian Marls of Merbah el Oussif (Jebel Tebaga, Tunisia) with special emphasis on the Ostracods**  
F. Lethiers, S. Razgallah, J. P. Colin and D. Vachard 227
10. **The "Cimpia Moment" (late Miocene, Romania) and the Pannonian-Pontian boundary, defined by ostracods**  
R. Olteanu 239
- Instructions to authors 248**

**Cover illustration:** A selection of Late Jurassic skolochorate dinocysts from the collections of Stratigraphic Services International Ltd.
